How to Do the Tapping
The following will make more sense if you have had at least one guided EFT session with a trained EFT professional. If you have not experienced an EFT session with an EFT practitioner, feel free to schedule a session (in person or by phone) at http://MassageTLC.com/schedule

As you follow the steps outlined in this document my may tap with either hand, however, it is usually more convenient to do the tapping with your dominant hand.

You should tap with the fingertips of your index and middle fingers. Using these two fingers to tap covers a little larger area than just tapping with one fingertip, and helps ensure you actually touch the correct tapping points as you tap.

When you tap, tap solidly, but never so hard as to hurt or bruise yourself. As you tap you should tap approximately eight times on each tapping point. Also, as noted on the next page, you will be repeating a "Reminder Phrase" while you are tapping.

1. The Setup Phase
During the Setup Phase you zero in on the problem you wish to address. Give it a score of 0 to 10 (where a 0 = no pain or discomfort and 10 = severe pain or discomfort), and then repeat an Affirmation Phrase (as described on the next page) three times while you tap the side of your palm on a spot we call the Karate Chop Point (see image below) with the index and middle fingers of your opposite hand.

The Karate Chop Point (KC): This point is located at the center of the fleshy part of the outside of your hand (either hand) between the top of the wrist and the base of the pinky finger. Simply tap the Karate Chop point of the non-dominant hand with the fingertips of the dominant hand. If you are right handed you would tap the Karate Chop point on your left hand (as shown above) with the fingertips of your right hand.

A Neutralizing Affirmation: A neutralizing affirmation (such as those shown on the next page) will help eliminate any subconscious and self-defeating negative thoughts that might otherwise hinder your progress. These affirmations are designed to acknowledge the problem and to create self-acceptance in spite of the existence of the problem you are trying to correct.
**During the Setup Phase, Use an Affirmation Like This . . .**

*Even though I have this ______________ (name the problem you wish to resolve), I deeply and completely love and accept myself.*

The blank listed above should be filled in with a brief description of the problem you want to address. You should create your own affirmation which is appropriate to your particular situation. Below are a few examples that will give you a good idea of how to do this.

- Even though I have this anger towards my father, I deeply and completely love and accept myself.
- Even though I have this troubling memory, I deeply and completely love and accept myself.
- Even though I have this pain in my lower back, I deeply and completely love and accept myself.

Now that you understand all the parts of the *Setup Phase*, performing it is easy. Remember, create a short affirmation (like those shown above) and repeat this phrase *three times* while continuously tapping on the *Karate Chop* point. *That’s all there is to it!* You can now move on to the EFT Tapping Sequence.

**2. The EFT Tapping Sequence**

The EFT Tapping Sequence is very simple in concept. It involves *tapping on the end-points of the major energy meridians in the body*, and is the method by which the energy system is balanced and emotional and physical problems relieved.

Most of the tapping points exist on either side of the body. It doesn’t matter which side you use, and it does not matter if you switch sides during the tapping sequence. If you wish, you can even tap both sides simultaneously by using both hands to do the tapping.

*You should tap with the fingertips of your index finger and middle finger.* Using these two fingers (feel free to add your ring finger if you wish) to tap covers a little larger area than tapping with one fingertip, and helps ensure you touch the correct tapping points.

When you tap, tap solidly, but never so hard as to hurt or bruise yourself. As you tap through the basic points, *simply tap approximately eight times on each point* as you repeat a *Reminder Phrase* that represents the condition you’re hoping to resolve.

**Reminder Phrase Examples**

Much like you did during the Setup Phase, while tapping each EFT tapping point *eight times* you simply say out loud an abbreviated phrase that represents the problem you are having and wish to resolve, such as:

- *This anger toward my father*
- *This troubling memory*
- *These nightmares*
- *This pain in my lower back*

Repeat this tapping sequence (tapping through the points shown on the next page) a few times, then note how you then feel about the problem on a scale of 0 to 10 (where a 0 = no pain or discomfort and 10 = severe pain or discomfort). After completing a tapping sequence if you are not down to zero then repeat the tapping sequence again. Our goal is to get you from wherever you started (such as an 8 or 9) down to a zero, so do as many “rounds” of tapping as you need to eliminate the anxiety, stress, grief, fear, anger, and/or pain you have been experiencing.
The Location of the EFT Tapping Points

The Facial Tapping Points

1. **Cr** for **C**rown – at the top of the head where the hair naturally splits (the crown area).
2. **EB** for beginning of the **E**ye **B**row – at the beginning (inside) of the eyebrow.
3. **SE** for **S**ide of the **E**ye – on the bone bordering the outside corner of the eye.
4. **UE** for **U**nder the **E**ye – on the bone under an eye about 1 inch below the pupil.
5. **UN** for **U**nder the **N**ose – on the small area between the bottom of your nose and the top of your upper lip.
6. **Ch** for **Ch**in – midway between the point of your chin and the bottom of your lower lip. Even though it is not directly on the point of the chin, we call it the chin point because it is descriptive enough for people to understand easily.

The Body Tapping Points

1. **CB** for **C**ollar **B**one – the junction where the sternum, (breastbone), collarbone and the first rib meet. To locate it, first place your forefinger on the U-shaped notch at the top of the breastbone (about where a man would knot his tie). From the bottom of the U, move your index finger down toward the navel, one inch then go to the left (or right) one inch.
2. **UA** for **U**nder the **A**rm – on the side of the body, at a point even with the nipple (for men) or in the middle of the bra strap (for women). It is about 4 inches below the armpit.
3. **BN** for **B**elow **N**ipple – for men, one inch below the nipple. For ladies, where the underside of the breast meets the chest wall.

**NOTE:** As you tap each point, remember to repeat the brief Reminder Phrase you came up with (such as, “this troubling memory,” as noted above) that represents the problem you wish to resolve.
